

Get Your Spring Glow: Lasers for all Ages & Stages

Laser Treatments are simple, safe and cost effective. They can reduce unwanted hair, provide skin rejuvenation, and improve the texture, clarity and overall appearance of your skin.

Acne: Nearly everyone gets acne in their lifetime. Our pulse-dye laser provides quick, fast and easy treatments by targeting the bacteria responsible for your acne outbreaks. You'll often see improvement within 7-10 days with possible long-term clearing.

Hair Removal: Our laser provides you with consistent, reproducible results that removes hair on a variety of skin types. Treatment areas include the face, under arms, legs, bikini lines, chest, abdomen and back.

Skin Rejuvenation: Laser treatments can reduce your wrinkles, age spots, pigmentation and redness. They can treat rosacea, scarring and spider veins on your face and legs. Lasers are also effective at treating sun damage and freckles and giving you tighter skin.
